EDUCATION

VIT Bhopal University — Expected June 2027
B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 7.76 / 10.0

Sri Siddhgopal Richhariya I C — 2021
Class XII (State Board) — 77.6%

Sri Siddhgopal Richhariya I C — 2019
Class X (State Board) — 79.67%

TECHNICAL SKILLS

- **Programming Languages**: Java, Python, JavaScript, SQL
- **Frontend**: React.js, HTML5, CSS3
- **Backend**: Node.js, Express.js, Flask, REST APIs
- **Databases**: MongoDB, SQLite
- **Machine Learning**: Pandas, NumPy, Scikit-learn
- **Tools**: Git, GitHub, VS Code, Postman, Streamlit
- **Core Concepts**: Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving

CERTIFICATIONS

- **Google IT Support** – Google
- **IBM AI Engineering Professional Certificate** – Coursera
- **Vityarthi Certifications** – Java, Python
- **NPTEL** – Marketing Analytics, Introduction to Machine Learning

PROJECTS

AI-Powered Behavioral Anomaly Detection for Cybersecurity *Python, Scikit-learn, SQLite, Streamlit, Plotly, NetworkX* — 2026
GitHub

- Built an end-to-end behavioral anomaly detection system by combining Isolation Forest, Local Outlier Factor (LOF), and Random Forest to detect five behavioral attack types.
- Engineered six behavioral features including failed-login velocity, geo-distance, device novelty, and access rate to improve threat detection accuracy.
- Developed an interactive Streamlit dashboard with attack-path visualization, incident timeline, contribution analysis, and MITRE ATT&CK mapping for explainable security analytics.
- Implemented automated incident correlation and real-time attack simulation to demonstrate an end-to-end cyber-security monitoring workflow.

SigmaChatGPT – AI Chat Application *React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS* — 2026
GitHub

- Developed a full-stack AI chatbot using React.js, Node.js, Express.js, and MongoDB with secure user authentication and database integration.
- Integrated AI APIs to generate real-time conversational responses with Markdown rendering and syntax-highlighted code blocks.
- Designed RESTful APIs for user authentication, chat management, and persistent conversation storage.
- Built a responsive and user-friendly interface while managing version control using Git and GitHub.

Smart Transaction Risk Analyzer using Machine Learning *Python, Pandas, NumPy, Scikit-learn* — 2026
GitHub

- Developed a machine learning model to classify financial transaction risk using supervised learning algorithms.
- Performed data preprocessing, feature engineering, and data normalization to improve prediction accuracy and model performance.
- Trained and evaluated multiple classification models using performance metrics to identify the most effective solution.
- Built a risk-scoring system to support fraud detection and assist in financial decision-making.

LANGUAGES & HOBBIES

Languages: English, Hindi
Hobbies: Nature Photography, Sketching, Art & Craft, Listening to Music
