EDUCATION

VIT Bhopal University Expected May 2027
B.Tech in Computer Science & Engineering CGPA: 7.76/10.0

Sri Siddhgopal Richhariya Inter College – *Class XII (State Board)* 77.6% (2021)

Sri Siddhgopal Richhariya Inter College – *Class X (State Board)* 79.67% (2019)

TECHNICAL SKILLS

- Programming Languages: Java, Python,JavaScript, SQL
- Web Backend: React.js, Node.js, Express.js, Flask, REST APIs, HTML5, CSS3
- AI/ML: Machine Learning, Scikit-learn, Pandas, NumPy, Feature Engineering, Model Evaluation
- Databases Tools: MongoDB, SQLite, Git, GitHub, VS Code, Postman, Streamlit, Plotly
- Core Concepts: Data Structures \& Algorithms, Object-Oriented Programming (OOP), Computer Organization Architecture

PROJECTS

DocuMind: Enterprise Document Intelligence Platform (In Progress) *Java, Spring Boot, React, FastAPI, PostgreSQL (pgvector), Docker* 2026
GitHub

- Building a microservice platform for citation-grounded question answering, contract field extraction, and compliance checks using retrieval-augmented generation (RAG).
- Designed JWT authentication, role-based workspace access, and audit logging so every user action is traceable.
- Created a pgvector schema for semantic document search, with an evaluation plan on public documents.

AI-Powered Behavioral Anomaly Detection *Python, Scikit-learn, SQLite, Streamlit, Plotly, NetworkX* 2026
GitHub

- Built an end-to-end pipeline covering synthetic data generation, SQLite storage, feature engineering, and model training to detect five behavioral attack types.
- Engineered six behavioral features (failed-login velocity, geo-distance, device novelty, access rate) and combined Isolation Forest, LOF, and Random Forest in an ensemble.
- Developed a Streamlit dashboard with attack-path visualization, incident timeline, and MITRE ATT&CK mapping for explainable analytics.

Last-Mile Delivery Tracker *React, TypeScript, Tailwind CSS, Spring Boot, PostgreSQL, FastAPI* 2026
GitHub

- Developed a full-stack delivery tracking application with a React 19, Vite, TypeScript, and Tailwind CSS frontend.
- Implemented a Spring Boot REST backend with PostgreSQL for persistent storage of delivery data.
- Integrated a FastAPI microservice with the Spring Boot backend using a multi-service architecture.

INTERNSHIP EXPERIENCE

MPOnline Limited *(Joint venture of Govt. of Madhya Pradesh and TCS), Bhopal* May 2026 – Jul 2026

AI/ML Intern: Credit Risk Assessment *Python, Scikit-learn, Pandas*
GitHub

– Worked on a credit risk assessment project using Python, Pandas, and Scikit-learn, performing data cleaning, preprocessing, and feature engineering.

Advanced Software Engineering and Development Intern *JavaScript, [Node.js/React]*
GitHub

– Worked on software development using JavaScript and web technologies, focusing on application features and modular code structure.

CERTIFICATIONS

– **Google IT Support** – Google
– **IBM AI Engineering Professional Certificate** – Coursera
– **Vityarthi Certifications** – Java, Python
– **NPTEL** – Marketing Analytics, Introduction to Machine Learning

LANGUAGES & HOBBIES

Languages: English, Hindi | **Hobbies:** Nature Photography, Sketching, Art & Craft, Music
